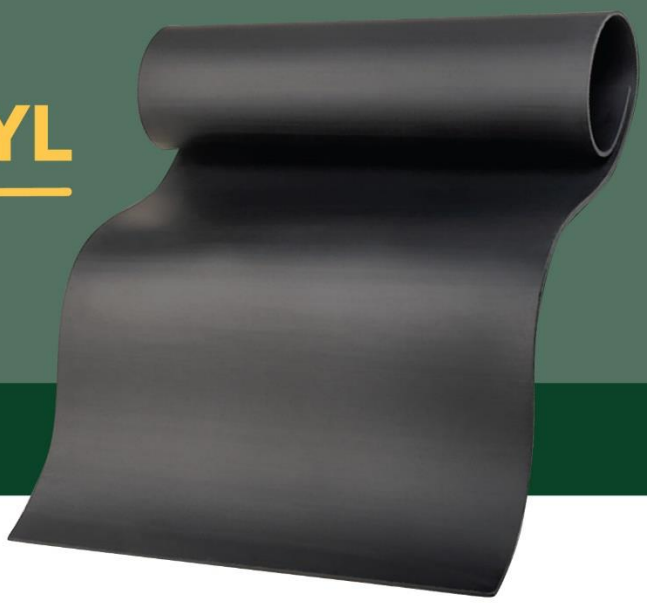
ENVIRO FLEX® MASS LOADED VINYL



PRODUCT DETAILS

Introducing the premier Mass Loaded Vinyl product available, EnviroFlex™ MLV. Made from a proprietary blend of 100% recycled pos-industrial vinyl materials, EnviroFlex™ MLV is a dense, flexible sheet that stops airborne sound waves. Unlike other soundproofing products, EnviroFlex™ MLV is laboratory tested for both physical properties and sound blocking performance, with STC lab results to go along with 1,000's of real-life success stories. Start your soundproofing project today with confidence, trusting EnviroFlex™ MLV

Technical Specifications

Tensile Strength	600 PSI
Elongation	125%
Tear Resistance	150 lbf.in
Service Temp	25° F to 175° F
FMVSS No. 302	Pass
STC Rating	26 (1LB) | 32 (2LB)

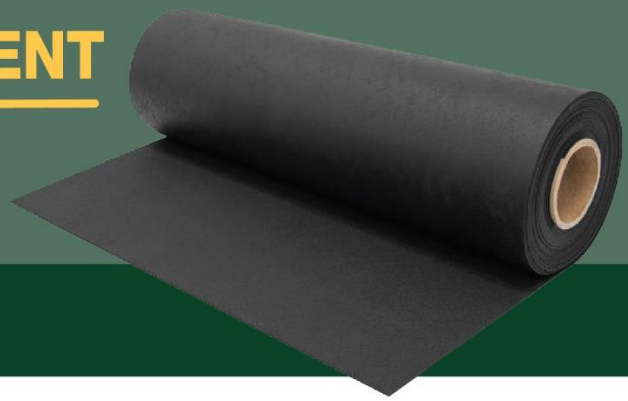
ENVIRO FLEX®

ECO-FRIENDLY FLOORING UNDERLAYMENT



PRODUCT FEATURES

- Comfort & Shock Absorption
- Versatile, Durable
- Moisture & Mold Resistant
- Sound Control & Acoustic Performance
- + Environmental impact
- Easy to install
- Eco-friendly, made from recycled material

Unmatched Resilience: Rubber boasts unparalleled resilience, capable of withstanding heavy foot traffic, furniture loads, and the rigors of daily life without wear and tear.

Superb Sound Insulation: Rubbers dense composition effectively absorbs impact noise, creating a quieter and more peaceful indoor environment.

Exceptional Moisture Resistance: Rubbers inherent resistance to water and moisture prevents mold, mildew, and other moisture-related issues.
